Moxabee's First Bale.

The first bale of cotton for the season of 1907-08 was brought to Macon Friday, August 30th, by Mr. Earle Skinner, and was sold at public auction to Mr. Walter B. Patty and brought the handsome sum of 181-2 cents per pound. According to Mr. S. L. Holt this is 12 days later than the first bale was marketed last season, and on August 30th 64 bales had been brought to his yard.

Considering the late Spring it is a matter of surprise that a bale could have been gotten ready for market at so early a date. The weather was so unpropitious during the planting season a large part of the cotton of this county had to be planted from two to four times and fully one half was planted between the first and middle of June, at a time when, ordinarily cotton is blooming. That cotton is ready for market now argues that Noxubee land and farmers are all right, as nothing but good land and good cultivation could mature cotton in so short a time, it being only from 10 to 14 weeks since the crop was planted.

I burned up all the pasteboards, and I should like to speak in every church in the country to the women and tell them what card playing led me to, and what it will lead them to. It was undermining the church. The whist and euchre parties were sweeping the women of the congregation and the church was sinking because of their neglect. The card craze as it prevails among women is the most serious competitor the church
